It has been established in early research that **DMT** has a **neuroplastic effect** on the **brain**, which means it **creates new connections** with **neurons**. **Neurogenesis** is a **very important process** that **needs to happen** after an **injury**.

**Algenon Pharmaceuticals (CSE: AGN)** is **preparing to launch** a **Phase 1 study** of **DMT** for the **treatment** of **stroke**.

There are **surprisingly few stroke treatments available** on the market today, which is why we are **very bullish** on **AGN**, especially at this **current market cap**.

**AGN** has a **low share count** and a **tight share structure**. There are **strong investors** behind this company including **AlphaNorth Asset Management**, which **increased** its **AGN stake** yesterday to **more than 13%**.

**AGN** is **awaiting approval** to be listed on the **NASDAQ**.
